

TechNet MID-AMERICA

Golf Tournament: July 27, 2009
Conference & Exposition: July 28–29, 2009
Gateway Convention Center, Collinsville, IL

DON'T MISS TECHNET MID-AMERICA, a unique annual conference that brings together the logistics and communications communities to **discuss key issues**, examine **lessons learned**, become **more efficient** in our joint environment, evaluate **emerging technologies** and **distribution concepts**, and map the **way ahead**.

CONFERENCE HIGHLIGHTS

- 70+ Exhibitors
- 3 Interactive Panel Discussions
- 4 Keynote Presentations
- 12+ Professional Development Seminars

CONFERENCE THEME

The conference theme for 2009 is *Building Efficient Infrastructures for Today's Joint Environment*. This theme supports the Department of Defense's focus on continuous improvement and developing greater efficiencies. After many years of deployment, sustainment, redeployment, and cyber and IT operations with the warfighter throughout the world (most recently in Southwest Asia) we must continue to improve our IT and Logistics support to be effective. The objective of this conference is to look at what we have learned and how we can better apply ourselves to the pressing missions at hand in a time of resource constraints.

CONFERENCE ATTENDEES AND ORGANIZATIONS (ALPHA ORDER)

- 18th Air Force (18 AF)
- 375th Airlift Wing (375 AW) 375 MDG / 375 CG / 375 CSPTS / 375 CS
- Air Force Communications Agency (AFCA)
- Air Mobility Command (AMC) A2 / A3 / A4 / A5/8 / A6 / TACC
- Air National Guard–St. Louis (ANG)
- Defense Information Systems Agency (DISA)
- Defense Information Systems Agency–Defense Information Technology Contracting Organization (DISA-DITCO)
- Defense Logistics Agency (DLA)
- Department of Defense (DoD) Personnel and Contractors from the following fields:
System-Oriented Architecture, Cyberspace Technology, Distribution Process, Performance-Based Contracting, Unified Communications, Wireless Technologies, Information Security, Global Supply Chain Management, End-to-End Visibility, Distribution Planning, Transportation/Distribution Interoperability, Sense and Respond Logistics, Automated Information Technology (AIT), Networking
- Global Logistics Support Center (GLSC)
- Military Sealift Command (MSC)
- National Geospatial Agency (NGA)
- Surface Deployment Distribution Center (SDDC)
- United States Transportation Command (USTRANSCOM) CS / J2 / J3 / J5/4 / J6

PRESENTATION OPPORTUNITIES

Submission Deadline: April 24 **Submit Online:** www.TechNetMidAmerica.org (Speaker Zone Tab)

Who Should Submit?

If you are (1) developing practical solutions to problems in information technology, communications and logistics that would help the DoD, consider submitting a presentation, or (2) if you are a leader in the industry/government, consider submitting a panel topic. If your panel topic is selected we may ask that you take the lead on acquiring a moderator and panelists.

Topics of Interest

Presentations pertaining to emerging and cutting-edge technologies or methodologies will be considered.

See reverse side for suggested topics.

MID-AMERICA

Golf Tournament: July 27, 2009
Conference & Exposition: July 28–29, 2009
Gateway Convention Center, Collinsville, IL

Proposed Conference Topics

INFORMATION TECHNOLOGY TOPICS:

- 8720 — The Clock is Ticking
- Architecture
- Career Transitions into the Private Sector
- Computer Forensics Tool Training
- Contracting
- DITSCAP/DIACAP
- Cyberspace Dominance
- Cyberthreats
- Cyberwarfare in 2010
- Developing the Joint Logician
- Distribution
- Enterprise Software
- Information Security
- Integration of Assets in Cyberspace
- Intelligence Support for Cyberspace
- Intelligence Support for Homeland Security
- IT Performance Measurement
- Joint IT Infrastructure
- Knowledge Management
- Merging Service Technologies/Services (e-mail, etc.)
- NetCentric Enterprise Services
- Networking Wireless Technologies
- Wireless Security
- Operational Planning and Readiness
- Single E-mail DoD Directory
- Small Business
- Systems Integration Services
- Testing and Evaluation
- Voice over IP (VoIP)
- Web 2.0
- Geospatial Visualization Tools (NCI)

- New Technologies and Potential Impacts/Uses (i.e., Facebook, Wikis)
- New Security Authentication Methods for Data Access, etc.
- Operational Planning
- Lean/Six Sigma
- Knowledge Management: Where Are We Now?
- IA Management
- IPv6
- Unified Comm

LOGISTICS TOPICS:

- Linking Joint Logistics Planning to the Execution Environment
- Logistics Simulation in the Joint Environment
- Transportation Logistics
- In Transit Visibility
- Theater Logistics
- Joint Logician Training
- Fusion Center Integration
- Performance-Based Agreements/Logistics
- Performance Measurement
- Scheduling Optimization
- Redeployment Preparation and Execution
- Reset
- BRAC and Joint Basing
- New Administration Infrastructure Program — U.S. Roads and Bridges
- Distribution Network improvements/Efficiencies
- Leveraging Defense Transportation Coordination Initiative (DTCI)
- Visibility — The Key to Efficiency
- AT21 — Driving Greater Efficiencies in Transportation Planning/Execution
